Profile

Google Certified Associate Android Developer in Kotlin with 6+ years of experience writing top-quality clean code for big companies and startups as well using agile methodologies such as Scrum and Kanban.

Dedicated to continuously developing and designing new features, collaborating with cross-functional teams, testing code, fixing bugs, and improving any existing codebase.

Highlighted Experience

Mobile Developer, Trusona – 2017-7 - Present

- Work closely with the experience team on designing and developing new features using a Kanban board.
- Write high-quality code in Java and Kotlin applying techniques such as TDD, pair programming and clean code.
- Collaborate with the product team to schedule automated releases using Fastlane.
- Improve existing codebase, maintain legacy code and increase test coverage.

Tech Skills

Android SDK,
Design Patterns,
SOLID, Java, Kotlin,
Groovy, Javascript,
XML, json, Gradle,
git, subversion,
REST, Scrum,
Kanban, MVP,
MVVM, Firebase,
TDD, Clean Code,
RXJava, coroutines,
Jetpack, etc.

Android Developer, Gorilla Logic – 2016-11 - 2017-7

- Collaborated with cross-functional teams to define, design and ship new features using Scrum.
- Worked on bug fixing and improving application performance.

Software Developer Senior Analyst – 2015-1 - 2016-11

- Developed features based on a requirements document provided by the client.
- Worked closely with the web team on developing the web services needed to integrate with the mobile application.

Education
